

Supplementary information, Figure S6. The formation of DR3/TL1A receptor complex and DISC complex. (A) HT29-DR3 cells were treated with 100nM taxol, 30nM vinblastine for 12 h. The DR3/TL1A complex was analyzed by Flag immunoprecipitation followed by western blotting with antibodies against Flag, TL1A, and TRADD. (B) HT29-DR3 cells were treated as in (A). The DISC complex was analyzed by caspase-8 immunoprecipitation followed by western blotting with antibodies against caspase-8 and FADD.
