a. Mean rate (subs/site/year)

10^{-7} 10^{-8}

b. Variance in rate (as proportion of mean rate)

0.001   0.01   0.1
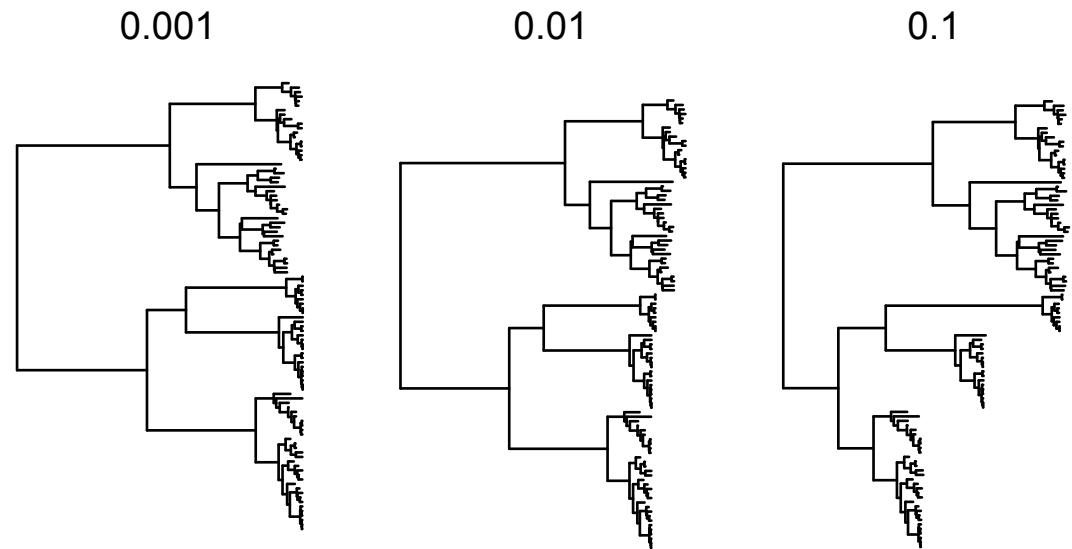

c. Temporal clustering of samples

Low   High
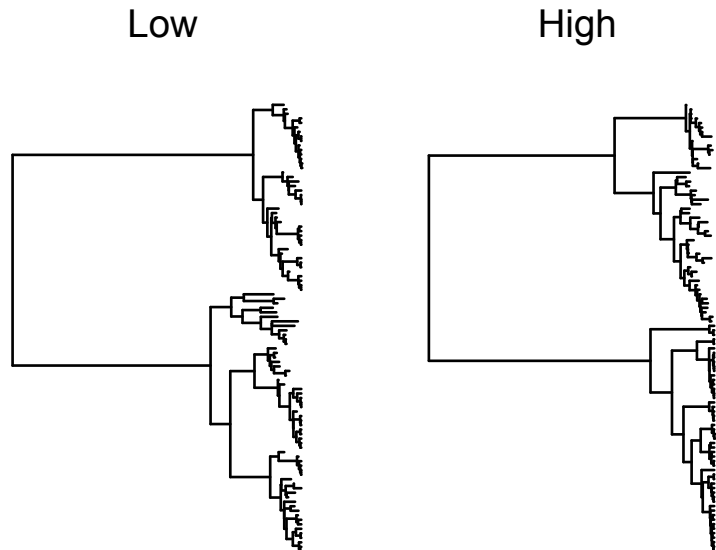

d. Method of inference

TempEst
Regression of root-to-tip distances
Strict molecular clock

LSD
Least-squares estimation
Allows deviations from strict clock

BEAST
Bayesian inference
Relaxed molecular clock
