

Supplementary Figure S1. Effect of fibrinogen heterozygosity on body weight. Body weights of Plg-R_{KT}^{+/+}/Fgn^{+/+}, Plg-R_{KT}^{+/+}/Fgn^{+/-}, Plg-R_{KT}^{-/-}/Fgn^{+/+} and Plg-R_{KT}^{-/-}/Fgn^{+/-} female littermates were determined by weighing mice 2 days postpartum. ANOVA revealed group differences: F=11.68, P<0.0001. **=P< 0.05 by Student -Newman-Keuls post hoc testing, n=4-5.
