

S1 Table. 630 European adult-onset HD patient dataset. Age: patient’s age at the time of data collection; Sex: M (male) and F (female); CAGexp: CAG number repeat in expanded allele; mAO: motor onset, age of the first motor symptoms; AHT condition: normotensive (patient without arterial hypertension record), with AHT (patient with arterial hypertension records) and pre-HD AHT (patient with arterial hypertension records who manifested hypertension before HD symptoms).

Patient	Age	Sex	CAGexp	mAO	AHT condition
1	54	M	43	50	Normotensive
2	42	M	47	36	Normotensive
3	63	M	41	57	Normotensive
