

Supplementary Table S1. Comparison of the sample characteristics between the baseline and the last follow-up in the EpiFloripa study (2012-2013) and NWAHS (2008-2009).

	EPIFLORIPA		NWAHS	
	Included in 2009 (N=1,720)	Evaluated in 2012* (n=1,222)	Included in 2000-03 (N=4,060)	Evaluated in 2008-10* (n=2,871)
Baseline characteristics				
Gender (males) - %	48.4	48.2	49.1	48.4
Age (years) - Mean±SD	37.1±11.3	36.0±12.0	44.9±18.2	42.8±16.7
Marital status (married or living with a partner) - %	60.4	57.1	62.2	64.1
Educational level (up to secondary) - %	55.8	55.4	43.1	41.6
Obesity†	15.7	15.5	27.0	25.7

SD = standard deviation

* Comparison considering baseline characteristics of each sample and using the respective sampling weights

† Obesity = body mass index ≥ 30.0 kg/m²
