2. What was your role during the dengue outbreak? Specifically, what tasks were you responsible for?

3. In your view, how did the SI-SSS perform during the dengue outbreak? What were the major challenges faced and how, from your perspective, did the MHMS respond?

4. The system expanded to collect data from more sites very quickly. How did this go? What challenges did you see/experience? How were these managed?

5. Health facilities experienced a large increase in patients seeking care during the outbreak. What impact did this have on the health system, and how did the MHMS/hospital actions manage these?

6. Thinking specifically about your role during the outbreak, what challenges did you (and your team) face? What caused these challenges? How were they managed?

7. How did you use the information produced by the enhanced outbreak surveillance system? Did the information provided meet your information needs at the time? If not, why not?

8. In your view, how reliable was the data that was being produced? What enhanced or undermined the information produced?

9. Is there anything else you would like to add?

Thank you for your participation.
