

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: SDHA-interacting proteins. Complete data from the MS analysis following anti-flag IP for the identification of proteins interacting with SDHA in CII_{low}.

File Name: Supplementary Data 2

Description: MS SWATH-detected proteins.

File Name: Supplementary Data 3

Description: Raw data and Z-score for the metabolites identified by NMR and LC-MS/MS from MDA231 sublines. The actual peak intensity of each metabolites and the calculated values of mean and standard deviation (STDEV) are provided. The Z-score was obtained by dividing the difference between actual peak intensities and mean value by the STDEV. Those bolded were identified with LC-MS/MS.
