

S1 Appendix. Original immunoblots used in the figures

Fig 4. Original images of immunoprecipitations carried out for MAT α 1 incubated with anti-HA (left) or anti-FLAG (right)

Fig 5. Original images of immunoprecipitations carried out for MAT α 2 incubated with anti-HA (left) or anti-FLAG (right)

Fig 6. Original images of immunoprecipitations carried out for actin B incubated with anti-FLAG (left) or anti-HA (right)

Fig 7. Original images of immunoprecipitations carried out for Ybx1 incubated with anti-HA (left) or anti-FLAG (right)

Fig 8. Original images of immunoprecipitations carried out for Hmgb1 incubated with anti-HA (left) or anti-FLAG (right)

Fig 9. Original images of immunoprecipitations carried out for Prkaca incubated with anti-HA (left) or anti-FLAG (right)

Fig 10. Original images of immunoprecipitations carried out for ALDOB (top) and HPD (down) incubated with a mixture of anti-HA and anti-BHMT
