

Supplementary Figure S2 Expression of AIF-1 after lentivirus infection in Ishikawa cells. **(A)** mRNA levels of AIF-1 in negative and AIF-1 lentivirus infection groups using RT-qPCR. **(B)** Protein levels of AIF-1 in negative and AIF-1 lentivirus infection groups using Western blotting. All data are presented as mean \pm SEM. The differences between groups were analyzed by independent sample *t*-test. Data were considered statistically significant if $P < 0.05$.
