
Characteristics of studies

Characteristics of excluded studies

Axelsen 1993

Reason for exclusion	No clinical outcome measures
----------------------	------------------------------

Beynon 2005

Reason for exclusion	Diagnosis study
----------------------	-----------------

Burks 1991

Reason for exclusion	Prevention study
----------------------	------------------

Cesarone 2008

Reason for exclusion	About patients with vascular diseases
----------------------	---------------------------------------

Chan 2009

Reason for exclusion	Not about chronic ankle instability
----------------------	-------------------------------------

De Vries 2006

Reason for exclusion	Review
----------------------	--------

Derksen 2005

Reason for exclusion	Diagnosis study
----------------------	-----------------

Derksen 2015

Reason for exclusion	Diagnosis study
----------------------	-----------------

Docherty 2004

Reason for exclusion	Electromyography and kinesiology
----------------------	----------------------------------

Doeringer 2010

Reason for exclusion	Non-operative treatment
----------------------	-------------------------

Faber 2004

Reason for exclusion	Not about chronic ankle instability
----------------------	-------------------------------------

Giza 2013

Reason for exclusion	Cadaver study
----------------------	---------------

Hayman 2010

Reason for exclusion	Prevention study
----------------------	------------------

Hupperets 2010

Reason for exclusion	Cost-Benefit analysis
----------------------	-----------------------

Janssen 2014

Reason for exclusion	Cost-Benefit analysis
----------------------	-----------------------

Johannes 1993

Reason for exclusion	Non-operative treatment
----------------------	-------------------------

Johnson 2007

Reason for exclusion	Diagnosis study
----------------------	-----------------

Konradsen 1999

Reason for exclusion	Review
----------------------	--------

Munk 1995

Reason for exclusion	Patients not randomize
----------------------	------------------------

Okcu 2006

Reason for exclusion	Non-operative study
----------------------	---------------------

Pijnenburg 2003

Reason for exclusion	Operative versus conservative treatment
----------------------	-----------------------------------------

Povacz 1998

Reason for exclusion	Operative versus conservative treatment
----------------------	-----------------------------------------

Schuh 2016

Reason for exclusion	Cadaver study
----------------------	---------------

Van Reijen 2014

Reason for exclusion	Prevention of ankle injuries
----------------------	------------------------------

Zwipp 1991

Reason for exclusion	Operative versus conservative treatment
----------------------	-----------------------------------------

Zwipp 1992

Reason for exclusion	Operative versus conservative treatment
----------------------	-----------------------------------------
