Analytic Datasets

Manuscript Title: Triclosan and triclocarban exposure, infectious disease symptoms and antibiotic prescription in infants – a community-based randomized intervention

Corresponding Author: Catherine Ley

There are 4 analytic datasets used for the results presented in this manuscript. All datasets are in .CSV format.

There is an excel spreadsheet titled 'S2_File2' which includes a data dictionary for each of the datasets listed below. The datasets are:

- 1) S2_File
Contains subject-level data for all subjects participating in the randomized controlled trial. Includes variables for flags for inclusion in the mITT cohort and mPP cohort.
- 2) S3_File
Contains survey-level data for mITT cohort for primary outcome analysis (has infection)
- 3) S4_File
Contains survey-level data for mPP cohort for primary outcome analysis (has infection)
- 4) S5_File
Contains visit-level data for antibiotic prescriptions based on medical record reviews
