

Supplemental figure S1. CERK siRNA is able to efficiently knock down CERK expression. MCF7 cells were treated with non-targeting (All Star) or CERK siRNA for 24 hrs. CERK mRNA levels were measured.

Supplemental figure S2. CERK siRNA is able to efficiently knock down CERK expression and does not impact growth. MDA cells were treated with non-targeting (All Star) or CERK siRNA for 24 hrs and harvested for MTT assay at the indicated timepoints. n=3, **** p<0.001.
