

Supplementary figure 1: Number of streptococcus isolates / strains affecting aquaculture, reported based on 16S rDNA sequences in NCBI database

S.Table 1: Number of streptococcus isolates / strains affecting aquaculture, reported based on 16S rDNA sequences in NCBI database

Particular	Number of isolates / strains (approximate)
Vagococcus salmaninarum	1-10
Streptococcu Paraauberis	10-100
Streptococcu Iniae	100-200
Lectococcus garvieae	200-300
Streptococcu dislactae	>400
Streptococcu agalactae	>400
