[†]Note that *Ccnd1*, *Cdkn1a* and *Fos* are reported as both IR-associated and TH-responding in the literature. Results of transcript regulation of respective signature genes in thyroid tissue adapted from Langen *et al.* (16). Adjusted p-values given as 0.0000 designate values below 10⁻⁵, i.e. values below the Nexus Expression limit. Conv., convoluted data; deconv., deconvolved data; cF, cell frequency (as used for deconvolution)
