

S11 Fig: Conidial pigmentation of two of three independent isolates of a *Pks1* gene's KD (Knock down) or KO (knock out) mutant. One of the three isolates for each mutant is shown in Fig. 6. Scale bars represent 1 mm in *M. album* and 10 mm in *M. anisopliae*, *M. brunneum*, *M. guizhouense*, *M. majus*, *M. acridum* and *M. album*.
