

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Variable importance statistics from PLSR models of the mRNA microarray, protein array and cell abundance.

File Name: Supplementary Data 2

Description: Variables affected by MTX, IFX and TCZ.

File Name: Supplementary Data 3

Description: Untreatable variables for MTX, IFX and TCZ of the mRNA microarray, and protein array.

File Name: Supplementary Data 4

Description: Disease-wide profile of transcriptional RMSs.

File Name: Supplementary Data 5

Description: Samples used in omics profiling.
