

Figure S1. Characterization of PD-L1 expression in unimmunized conditional knockout mice. **(A)** PD-L1 expression on iLN DCs in CD11cCre⁺ PD-L1 floxed (F/F) mice compared to the indicated controls. Data are depicted as MFI. **(B)** Percentage of PD-L1⁺ DCs in untreated CD11cCre⁺ PD-L1 F/F and control mice. **(C)** PD-L1 expression on iLN B cells in CD19Cre⁺ PD-L1 floxed (F/F) mice. **(D)** Percentage of PD-L1⁺ B cells in untreated CD19Cre⁺ PD-L1 F/F and control mice. Data indicate means +/- standard error of at least 3 mice and are representative of 2 independent experiments, Student's two-tailed unpaired t test.
