

Supplemental Figure 1: β A3/A1-crystallin protein is expressed in ocular melanoma cells. β A3/A1-crystallin protein was shown to be expressed in ocular melanoma OCM3 cells, but not in non-polarized ARPE-19 cells. Protein lysates from the lens of *Cryba1^{fl/fl}* mice were used as a positive control for β A3/A1-crystallin expression. All values are Mean \pm S.D, n = 3.
