

## SUPPLEMENTARY MATERIAL

**Table 4.** Comparative analysis between classifications obtained from the Classification and Regression Trees (CRT) method, with Twoing algorithm, and the histological classification of follicular adenomas (FA) and follicular carcinomas (FC).

<i>Histological Classification</i>	<i>Classification by CRT</i>		
	<i>FA</i>	<i>FC</i>	<i>Correct Classification (%)</i>
FA	42	0	100
FC	0	20	100
<i>Global Classification (%)</i>			100

FA: follicular adenomas; FC: follicular carcinomas.
