

Figure S10. EI24 Promotes the Association between IP3R and VDAC2.

(a-c) HEK293T cells transfected with 3×Flag-EI24 and IP3RI (tm)-GFP or IP3RIII (tm)-GFP (the transmembrane domain of IP3RI or IP3RIII tagged with GFP) were subjected to immunoprecipitation (IP) with anti-Flag or anti-GFP antibodies and western blot (WB) analysis.

(d) HEK293T cells transfected with IP3RIII (tm)-GFP, VDAC2-HA, and 3×Flag-EI24 or 3×Flag-EI24ΔC were subjected to immunoprecipitation with anti-GFP antibodies and western blot analysis.

(e) HEK293T cells transfected with 3×Flag-EI24 were subjected to immunoprecipitation with an anti-IP3RIII antibody and western blot analysis with anti-VDAC2 and anti-Flag antibodies.
