

Supplemental Fig S8. The recurrence of 5 AAMR events in the validation dataset. (A) A bar chart shows the frequency of being observed for each of the unique AAMR events. (B) The UCSC Genome Browser image depicts a unique AAMR event which was observed 4 times in the validation dataset (*Alu-Alu* gain panel) and 5 times in the DGV database (Database of Genomic Variants). (C) Another AAMR event was detected 9 times in the validation dataset and 4 times in the DGV database.
