

Supplemental Figure S6: Targeted DNA demethylation by dC9Sun-TET1 at *GAD1* intron

Targeted DNA demethylation by dC9Sun-TET1 at a *GAD1* intron, measured by targeted bsPCR-seq, off-target regions (*GRHL2* promoter and *DLG5* enhancer). y-axis: Δ mCG puromycin treatment only - dC9Sun-Tet1 (*GAD1* sgRNA), n=2 replicates, sd - error bars).
