

Supplementary Figure 3

Supplementary Figure 3: Co-expression of immune checkpoints in murine glioma. Boolean gating was performed on CD8⁺ T cells isolated from murine CT2A (n=5) or SMA-560 (n=5) tumors (red), as well as matched tumor-bearing blood (blue) and naïve blood (black) (n=5) to determine co-expression of PD-1, Tim-3, and Lag-3. Bars represent means +/- SEM. *p<0.05; **p<0.01; ***p<0.0001 by one-way ANOVA followed by Tukey's post-hoc test.
