

## **Description of Additional Supplementary Files**

**Supplementary Data 1:** Differential chromatin analysis results for age at death.

**Supplementary Data 2:** GREAT analysis of differentially accessible peaks for age at death (9,396 peaks, 20% FDR)

**Supplementary Data 3:** Differential chromatin analysis results for post-mortem interval

**Supplementary Data 4:** GREAT analysis of differentially accessible peaks for post-mortem interval (2,328 peaks, 20% FDR)

**Supplementary Data 5:** Differential chromatin analysis results for diagnosis (control vs schizophrenia).

**Supplementary Data 6:** GREAT analysis of differentially accessible peaks for diagnosis (control vs schizophrenia, top 1000 peaks).

**Supplementary Data 7:** Meta-data variables associated with samples used in this study.
