

Supplemental Figure S3. Inhibitory effect of miR-936 and miR-4260 mimics on HaCaT cells.

EdU incorporation assay in HaCaT cells treated with the NT siRNA #1 (control), miR-936 or miR-4260 mimics. Results are representative images from three independent experiments. The percentage of EdU-positive cells was quantified and is shown as mean \pm SD. p values were calculated using one-way ANOVA test (** $p < 0.01$; *** $p < 0.001$), compared with the NT siRNA #1 value, accordingly.
