

A Bayesian state-space model using age-at-harvest data for estimating the population of black bears (*Ursus americanus*) in Wisconsin

Maximilian L. Allen, Andrew S. Norton, Glenn Stauffer, Nathan M. Roberts, Yanshi Luo, Qing Li, David MacFarland, and Timothy R. Van Deelen

Supplementary Information 1. The four management zones used by WDNR for black bears in Wisconsin. The figure was created with ArcGIS 10.3 (www.arcgis.com) with a base map from the WDNR GIS open data portal (<https://data-wi-dnr.opendata.arcgis.com/>).
