Sequences, transcript name and ID from mouse PIWIs isoforms were obtained from Ensembl database (<http://www.ensembl.org/index.html>). Mitochondrial targeting and subcellular location of PIWI isoforms were carried out using MITOPROT II and TargetP 1.1, respectively. MitoProt probability to export protein to mitochondria, from 0-1 values. TargetP: mTP values represent a mitochondrial localization score, from 0-1 values; and reliability class (RC), from 1 to 5, where 1 indicates the strongest prediction.
