

Additional file 3. miR-139-5p expression was quantified by qRT-PCR analysis.

miR-139-5p mimics significantly increased miR-139-5p expression (normalized to U6 RNA) in both LN229 cells (Left) and U87 cells (Right) (* $P < 0.05$. ** $P < 0.01$. NS, not significant), relative to the control.
