Transient inhibition of NF- κ B signaling enhances ex vivo propagation of
human hematopoietic stem cells

Mehrnaz Safaee Talkhoncheh, Agatheeswaran Subramaniam, Mattias
Magnusson, Praveen Kumar, Jonas Larsson, and Aurélie Baudet

Disclosures: none

Contributions: JL, AB, and MS designed, realized, and analyzed experiments with the help of PK. AS and MM performed microarray analysis. AS performed the cytokine beads array. All authors contributed to manuscript preparation.
