

Table with multiple columns containing numerical data, likely representing a dataset or a grid of values. The table is structured with rows and columns, and contains various numerical entries.

Table with 10 columns containing numerical data. The table is organized in a repeating grid pattern across the page.

Table with columns: AMP, CRP, RUS, USG, and multiple columns of numerical data. The table contains 100 rows of data, each representing a different location or facility. The columns represent various metrics, likely related to air quality or environmental monitoring. The data is organized in a grid format, with the first four columns (AMP, CRP, RUS, USG) providing categorical information and the subsequent columns providing numerical values. The values are often presented in a 2x2 grid for each row, suggesting a comparison of two different metrics or conditions. The overall structure is a dense, repetitive table of data points.

Table with multiple columns containing alphanumeric identifiers (e.g., AMP, OPR, STR, DCM, TDP, AMP-CR, AMP-FCR, AMP-FCR-TMP, AMP-FCR-TMP-T) and numerical data points.

Table with columns for various identifiers (e.g., AMF025820, RUS, DOK, UDF, FUG) and rows of numerical data. Each row represents a specific record across multiple categories.

Table with 4 columns: S/N, Frequency, Bandwidth, and Modulation. Contains a large number of rows representing various channel configurations.

Table with columns for identification numbers (e.g., 42100975, 42100976, etc.), company codes, and names. Each row contains a long list of these identifiers, representing different entities or records.
