

Fig S7: Characteristics of individual infant rabbits from which cecal fluid was harvested for metabolomic analysis. Panels show colonization, cecal fluid accumulation, *ctx* transcription, and *tcpA* transcription for individual infant rabbits. Diamonds denote infant rabbits from which cecal fluid was harvested for metabolomics studies. ND indicates not done. WT 1-5, Δ EIIA 1-2, and Δ 16 1-2 came from litter 1. WT 6-9, Δ EIIA 3-10, and Δ 16 3-8 came from litter 2.
