

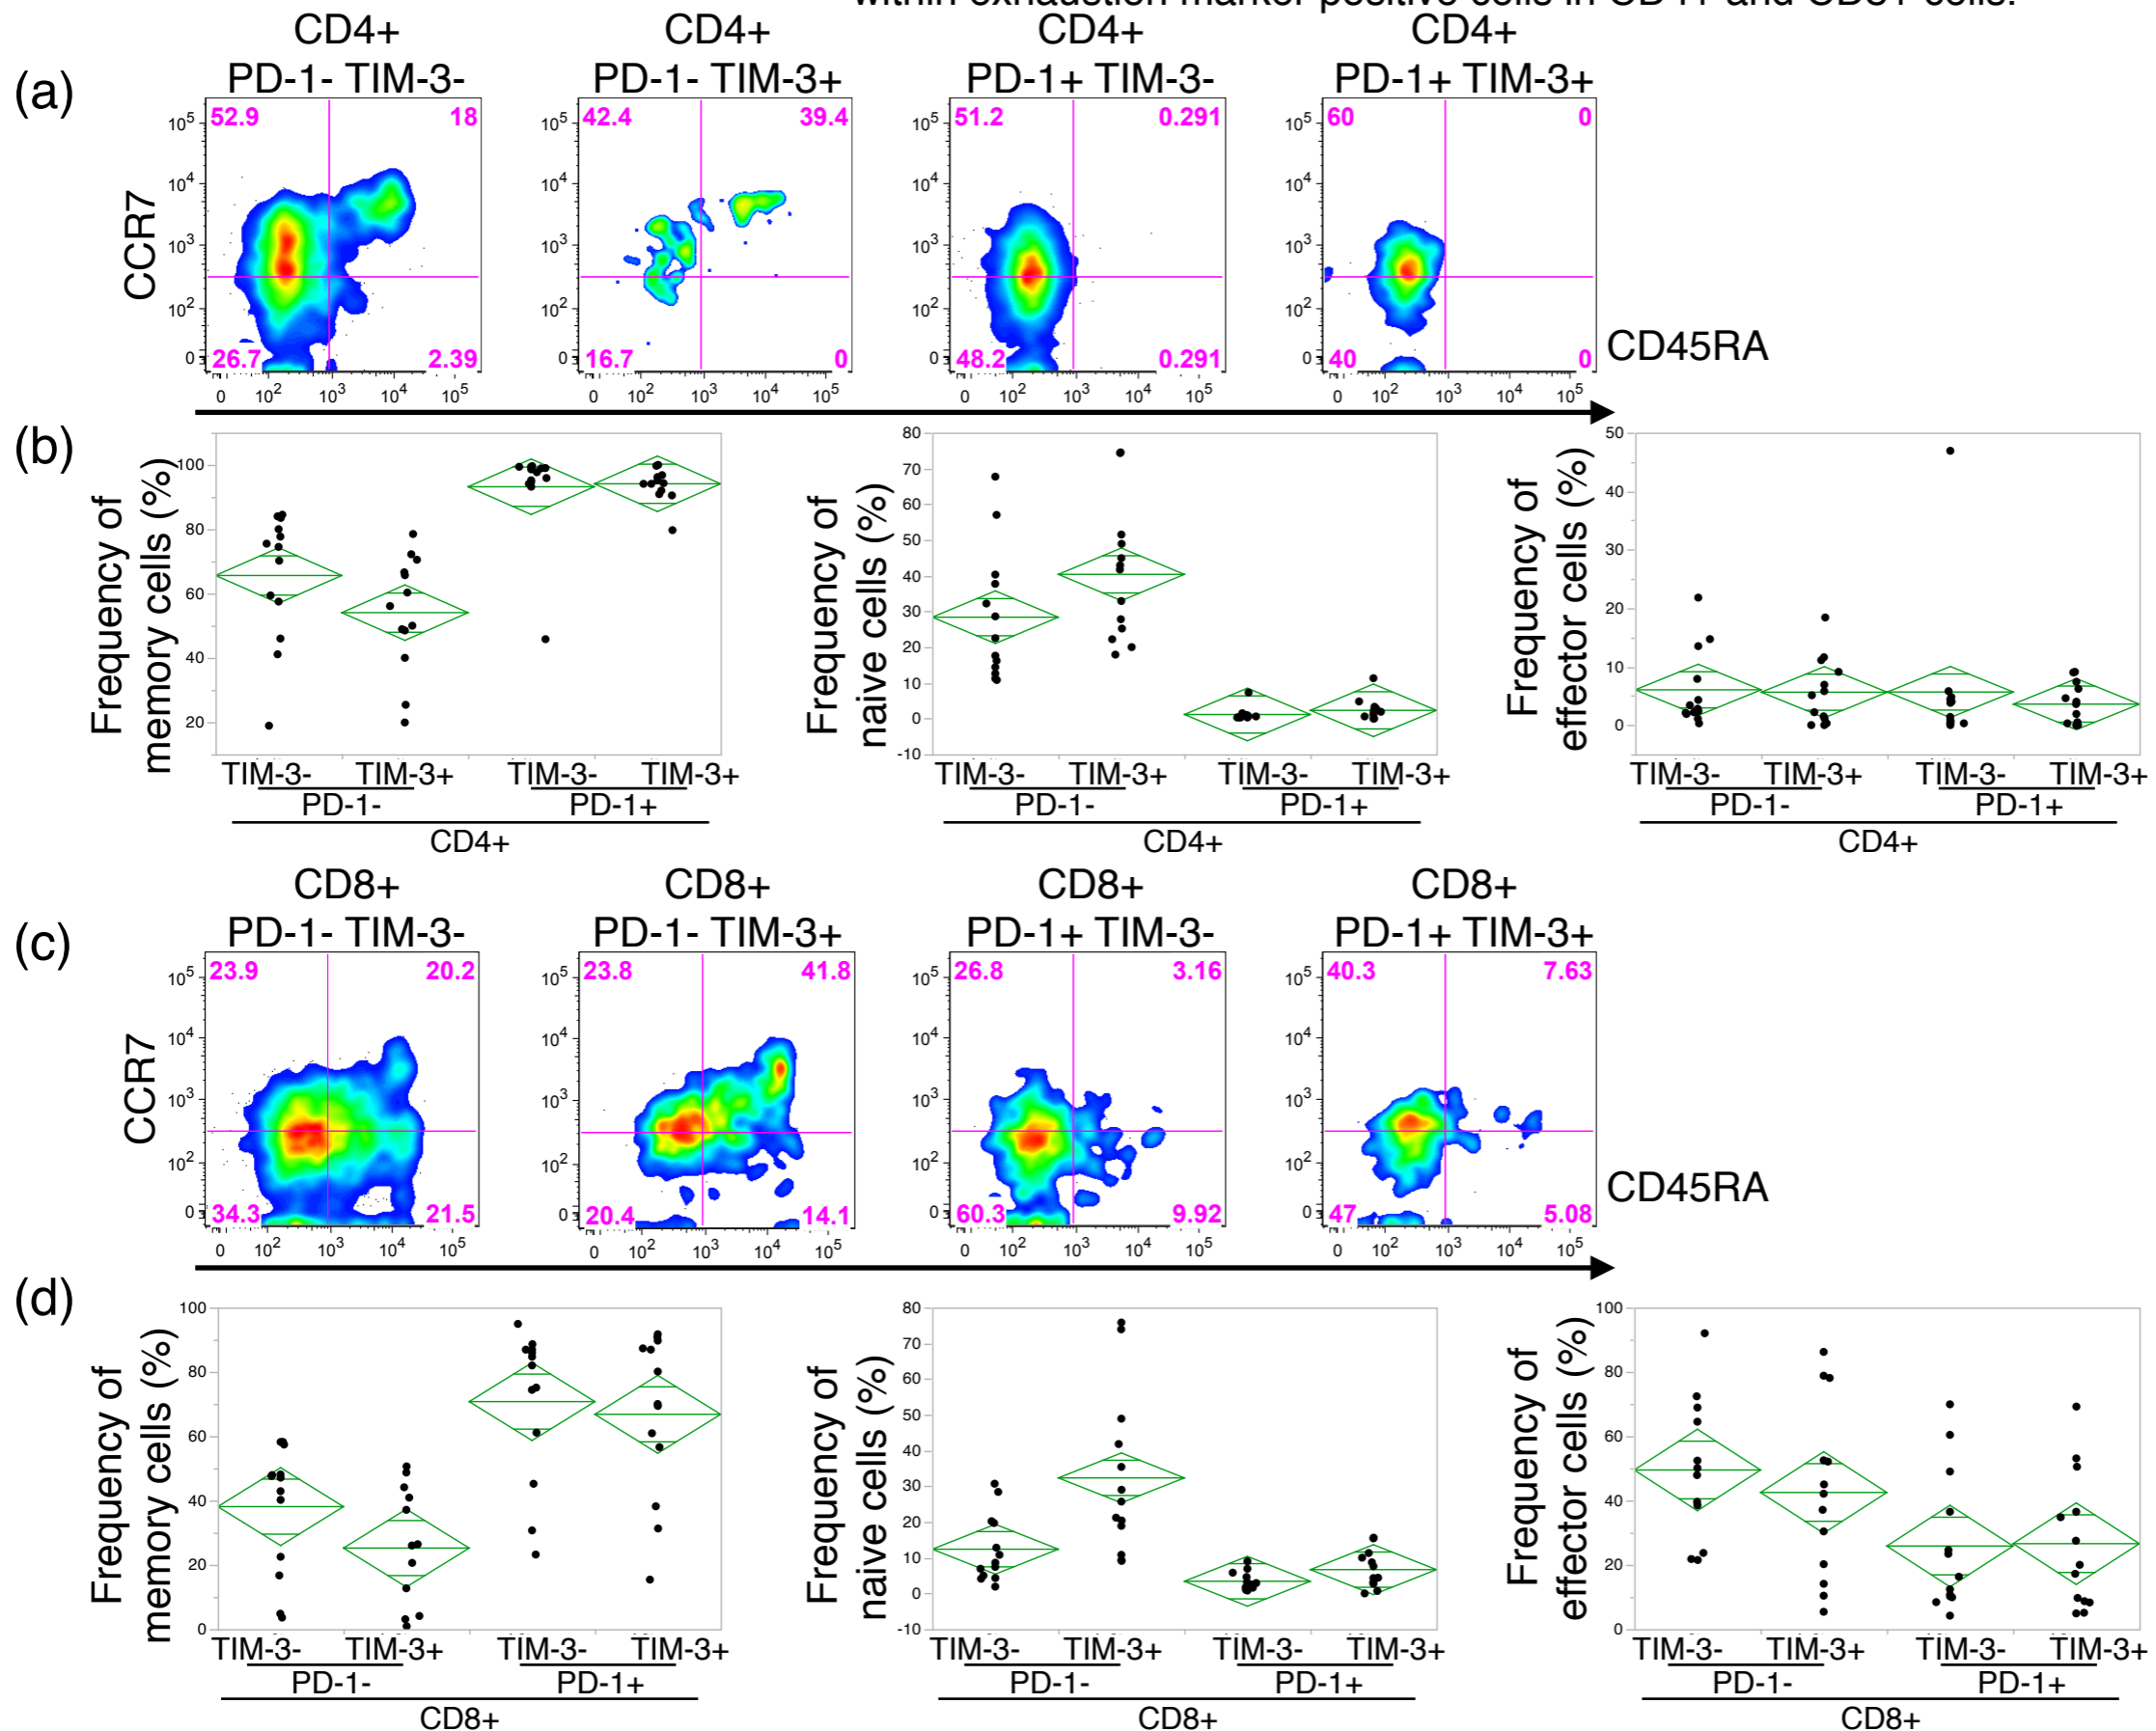

Figure S3

Frequencies of memory/naïve/effector phenotype ascites TILs within exhaustion marker positive cells in CD4+ and CD8+ cells.

(a, c) Representative FACS plots regarding memory/naïve/effector phenotype of PD-1- TIM-3- / PD-1- TIM-3+ / PD-1+ TIM-3- / PD-1+ TIM-3+ in ascites TILs within CD4+ and CD8+ cells (case 62). (b, d) Summarized dot plots of the frequencies of memory/naïve/effector ascites TILs in each fraction (PD-1- TIM-3- / PD-1- TIM-3+ / PD-1+ TIM-3- / PD-1+ TIM-3+) among CD4+ and CD8+ cells (n=13). Median values and 95% CI are shown with diamond.
