Carcass	0.01	0.001	0.02	0.01

Supplemental Figure 1. *Ex vivo* near-infrared fluorescence imaging 24 h p.i. of ^{124}I -A2cDb or ^{124}I -A2cDb-800. Organs of mice injected with ^{124}I -A2cDb show the expected autofluorescence in stomach, liver, intestines and spleen. In mice injected with the dual-modality probe ^{124}I -A2cDb-800, fluorescence signal is seen in the xenograft. Clearance of the tracer results in increased fluorescence signal in kidneys and slightly elevated signal in the liver.
