

Reviewer Report

Title: Population genomics of wild Chinese rhesus macaques reveals a dynamic demographic history and local adaptation, with implications for biomedical research

Version: Revision 1 Date: 4/19/2018

Reviewer name: Jeffrey Rogers

Reviewer Comments to Author:

All my major concerns have been satisfactorily addressed. However, I see several typos or other minor problems with the text.

Some examples,

line 162: should be "from" instead of "form"

line 230: I think the authors mean "upregulated" not "unregulated"

line 285: should be "have" not "has"

I think there are other similar issues.

I recommend publication after minor revision to fix these small problems.

Methods

Are the methods appropriate to the aims of the study, are they well described, and are necessary controls included? Choose an item.

Conclusions

Are the conclusions adequately supported by the data shown? Choose an item.

Reporting Standards

Does the manuscript adhere to the journal's guidelines on [minimum standards of reporting?](#) Choose an item.
