Supplemental Results Figure 1: Attributable DALY rate disaggregated by cause by location, sex, and age in 2016

Attributable DALY rate disaggregated by cause, China, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, North Korea, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Taiwan, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Indonesia, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Laos, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Malaysia, by sex and age in 2016.

Cause

- Tuberculosis
 - Lower respiratory infections
 - Esophageal cancer
 - Liver cancer
 - Larynx cancer
 - Breast cancer
 - Colon and rectum cancer
 - Lip and oral cavity cancer
 - Pharynx and nasopharynx cancer
 - Ischaemic heart disease
- Ischaemic stroke
 - Hemorrhagic stroke
 - Hypertensive heart disease
 - Atrial fibrillation and flutter
 - Cirrhosis and other chronic liver diseases
 - Pancreatitis
 - Epilepsy
 - Alcohol use disorders
 - Diabetes mellitus
 - Transport injuries
- Unintentional injuries
 - Self-harm
 - Interpersonal violence

Attributable DALY rate disaggregated by cause, Maldives, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Mauritius, by sex and age in 2016.

Attributable DALY rate disaggregated by cause, Philippines, by sex and age in 2016.

Female

Male

- Cause**
- Tuberculosis
 - Ischaemic stroke
 - Unintentional injuries
 - Lower respiratory infections
 - Hemorrhagic stroke
 - Self-harm
 - Esophageal cancer
 - Hypertensive heart disease
