

THE LANCET

Supplementary appendix 2

This appendix formed part of the original submission and has been peer reviewed.
We post it as supplied by the authors.

Supplement to: GBD 2016 Alcohol Collaborators. Alcohol use and burden for 195 countries and territories, 1990–2016: a systematic analysis for the Global Burden of Disease Study 2016. *Lancet* 2018; published online Aug 23. [http://dx.doi.org/10.1016/S0140-6736\(18\)31310-2](http://dx.doi.org/10.1016/S0140-6736(18)31310-2).

Supplemental Results Appendix for Alcohol use and burden: a systematic analysis from the Global Burden of Disease Study 2016 for 195 countries and territories, 1990–2016

Contents

Supplemental Results Table 1: Prevalence of current drinkers and abstainers, Population average of standard drinks daily, Percent of total attributable deaths, Percent of total attributable DALYs, Attributable deaths, and DALYs to alcohol use by location, year, sex, and age for GBD 2016	2
Supplemental Results Figure 1: Attributable DALY rate disaggregated by cause by location, sex, and age in 2016	3

Supplemental Results Table 1: Prevalence of current drinkers and abstainers, Population average of standard drinks daily, Percent of total attributable deaths, Percent of total attributable DALYs, Attributable deaths, and DALYs to alcohol use by location, year, sex, and age for GBD 2016

Location	Year	Sex	Age	Prevalence of current drinkers	Prevalence of abstainers	Population average of standard drinks daily	Percent of total attributable deaths	Percent of total attributable DALYs	Attributable deaths	Attributable DALYs
Global	1990	Female	All Ages	26% (24-29%)	74% (71-76%)	0.76 (0.74-0.8)	1.3% (1.1-1.6%)	2% (1.4-2.8%)	450000 (300000-610000)	1500000 (1200000-1800000)
