

Supplemental Figure 3

Supplemental Figure 3: Iba1⁺ cell integrated density is reduced in females and similar in male Ccl2 KO mice compared to controls. (A & C) bar graph and (B & D) dot plot of intensity of Iba1⁺ label in CNV lesions 7 days after laser (n = 1 study in females, n = 2 studies in males, n = 17 – 24 data points per group). Statistical analysis performed by an unpaired t-test. AU = arbitrary units, ns = non-significant, p > 0.05
