

**SUPPLEMENTARY FIG. S2.** Kaplan-Meier estimates of distant metastases free survival. (A) Kaplan-Meier estimate of distant metastases-free survival based on T1-3 versus T4 status. Blue line, T1-T3 status; green line, T4 status ( $p=0.487$ ). (B) Kaplan-Meier estimate of distant metastases-free survival based on N0 status versus N1 status. Blue line, N0 nodal status; green line, N1 status ( $p=0.608$ ). (C) Kaplan-Meier estimate of distant metastasis free survival based on low risk versus high risk pathology status. Blue line, low risk status; green line, high risk status ( $p=0.238$ ). (D) Kaplan-Meier estimate of distant metastasis free survival based on RT  $\leq 3$  months versus  $>3$  months. Blue line,  $\leq 3$  months; green line,  $>3$  months ( $p=0.246$ ).
