

SUPPLEMENTARY FIG. S3. Kaplan–Meier estimates of distant metastases free survival. **(A)** Kaplan–Meier estimate of overall survival based on T1–T3 versus T4 status. Blue line, T1–T3 status; green line, T4 status ($p=0.653$). **(B)** Kaplan–Meier estimate of overall survival based on N0 status versus N1 status. Blue line, N0 status; green line, N1 status ($p=0.913$). **(C)** Kaplan–Meier estimate of overall survival based on low risk versus high risk pathology status. Blue line, low risk; green line, high risk status ($p=0.955$). **(D)** Kaplan–Meier estimate of overall survival based on RT ≤ 3 months versus >3 months. Blue line, ≤ 3 months; green line, >3 months ($p=0.889$).
