

Web Figure 1. The prevalence (with 95% confidence limits) of meeting 2008 *Physical Activity Guidelines (PAG) for Americans* (1) by race-sex group at Baseline (2005-06) and 10-Year Follow-up (2015-16) (n=962).

Web Table 1. Baseline (2005-06), 10-year follow-up (2015-16), and 10-year change accelerometer-determined physical activity and sedentary behavior estimates within and stratified by baseline age and cardiorespiratory fitness groups in the Coronary Artery Risk Development in Young Adults (CARDIA) study (n=962).

Variable	Baseline Age						Baseline Fitness							
	<45 years (n = 398; 41.4%), mean (SE)			≥45 years (n = 564; 58.6%), mean (SE)			<Median (452 seconds) (n = 493; 51.2%), mean (SE)			≥Median (452 seconds) (n = 469; 48.8%), mean (SE)
