Battiston et al, Multiplex core-periphery organization of the human connectome Journal of Royal Society Interface

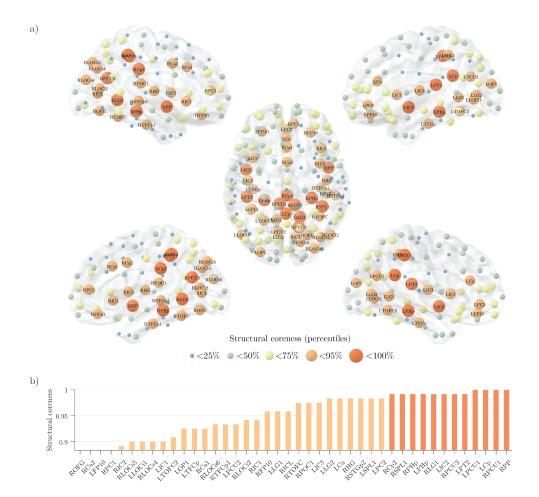

Figure S2: Panel a) shows the node structural coreness from different points of view: external view in the top row, internal view in the bottom row. The color and size of each node code for the percentile to which it belongs as specified in the legend. In panel (b) we report the value of structural coreness of the nodes beyond the 75th percentile with the same color code.
