3 ***Supplementary Figure 1: Barrett's Methylation candidates***

4 These data were from Alvi et al 2013. (A) Boxplots representing the methylation level of the
5 differentially methylated genes in Barrett's compared to normal tissue. (B) Heatmap
6 representing the non-supervised hierarchical clustering of patients according to the
7 methylation level of genes of interest.

12
13 ***Supplementary Figure 2: Methylation level of B3GAT2, CDX2 and Vimentin***

14 Boxplots representing the methylation level of the B3GAT2, CDX2 and Vimentin (VIM)
15 genes in Barrett's compared to normal tissue from Alvi et al 2013 dataset.
16
17
18

19
20 ***Supplementary Figure 3: Methylation levels of our identified markers according to the***
21 ***length of the Barrett's segment using the Cytosponge™.***
22

23 Dotplot presenting sensitivity variation by circumferential (C) and maximal (M) Barrett's
24 length.
25
26
27

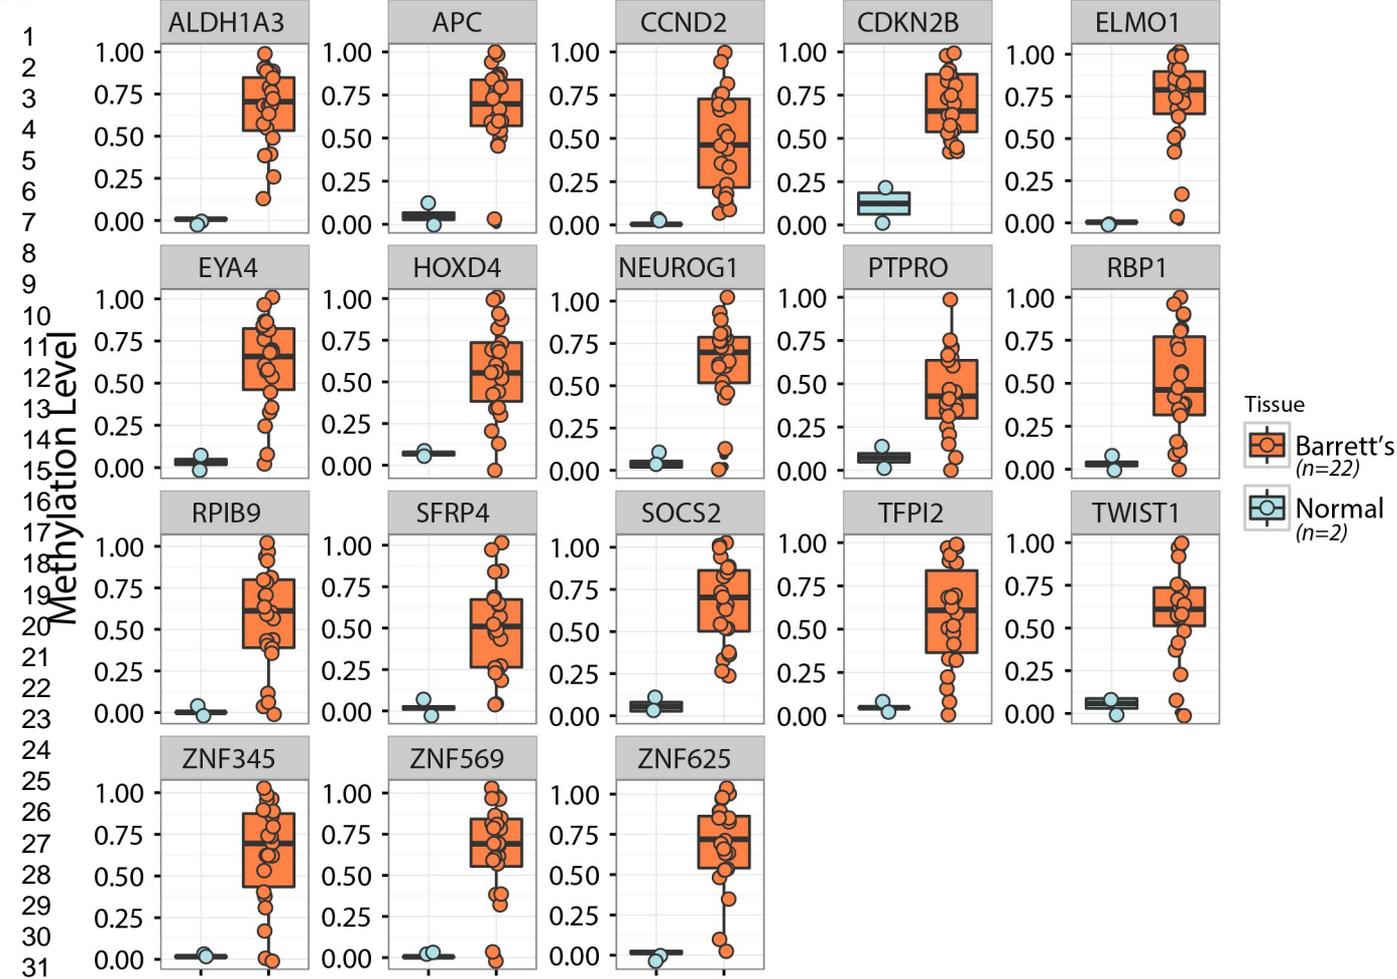

28 ***Supplementary Figure 4: Methylation status in dysplasia and adenocarcinoma.***

29 Boxplot of normalised beta values showing hypermethylation of each gene candidate in
30 Barrett's and Oesophageal adenocarcinoma biopsies compared to normal tissue – data
31 extracted from Alvi's dataset (Alvi et al., 2013)
