

**S4 Fig.** Analysis of PFS (A) and OS2 (B) with first-line only systemic chemotherapies in patients with metastatic uveal melanoma. CI, confidence interval; PFS, progression-free survival (defined as the time interval from the initiation of first-line systemic therapies to the date of documented disease progression or death from any cause); OS2, overall survival 2 (defined as the time from recurrence of uveal melanoma to death from any cause).
