

Supplementary Data

SUPPLEMENTARY FIG. S1. IL-6 mRNA levels from BM-MSCs (A) and AT-MSCs (B) that were unstimulated (Uns) or stimulated with 0.1 or 1 $\mu\text{g}/\text{mL}$ LPS for 8 or 24 h. Results (mean \pm SEM) are from one cell preparation of each type assayed in triplicate. AT, adipose tissue; AU, arbitrary units; BM, bone marrow; IL-6, interleukin-6; LPS, lipopolysaccharide; mRNA, messenger RNA; MSCs, mesenchymal stem/stromal cells; SEM, standard error of the mean.
