

Supplementary Materials:

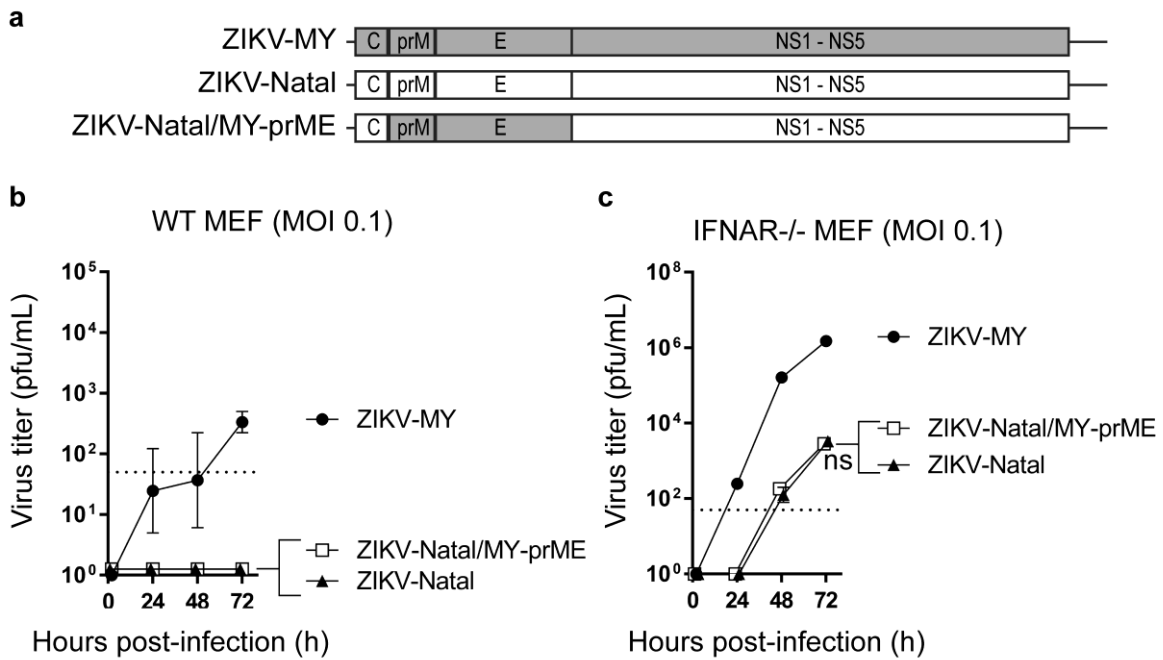

Figure S1. Construction and characterization of ZIKV-Natal/MY-prM/E chimeric virus. (a) Schematic depicting the ZIKV-MY and ZIKV-Natal parental viruses, and the constructed ZIKV-Natal/MY-prME chimeric virus; Growth kinetics comparing ZIKV-MY, ZIKV-Natal, and ZIKV-Natal/MY-prME was performed on (b) WT and (c) IFNAR^{-/-} MEF cells at an MOI of 0.1, and culture supernatants harvested at the indicated time points post infection and titered on Vero cell by plaque assay.
