

Supplementary Data

Supplementary Figure S1. Antigen-specific humoral responses in human mucosal secretions following DNA prime-boost vaccination regimens. Individual IgG and IgA responses within cervical and rectal secretions are shown (ng/mL) for participants post protein boost (week 22), the primary endpoint. i.d._{EP} + i.m. (orange, group 1), i.d. + i.m._{EP} (light blue, group 2), and i.d._{EP} + i.m._{EP} (gray, group 3). Bars represent median points.
