**Table S1.** Body weight and blood parameters for animals undergoing the <sup>14</sup>C-2-DG experiment

Treatment group	Weight (g)	<sup>14</sup> C-2-DG in plasma (nCi/ml)	T-Test (diff)	Blood Glucose (nmol/L)	T-Test (diff)
<b>Vehicle</b>	25.87 ± 0.53	0.95 ± 0.16	0.55, n.s	11.12 ± 0.36	0.74, n.s
<b>WIN 55,212-2</b>	26.89 ± 0.35	1.36 ± 0.65		10.96 ± 0.33	0.16 ± 0.50

Chronic, intermittent WIN 55-212-2 administration did not significantly alter the weight of the animals. Blood glucose levels and <sup>14</sup>C-2-DG levels at the moment of animal sacrifice show no significant statistical differences between WIN 55-212-2 treated animals and controls (n = 10, under unpaired Student's T Test).

**Table S2.** Local cerebral glucose utilisation (LCGU) in WIN 55,212-2 and control animals

Impact of chronic, intermittent WIN 55,212-2 administration on local cerebral glucose utilisation (LCGU). Data is shown as Mean  $\pm$  SEM <sup>14</sup>C-2-DG uptake ratio. In bold, statistically significant differences found between WIN 55,212-2 and vehicle treated animals are shown. \*denotes p<0.05, Student's t-test.

Functional connectivity of the dorsal subiculum (VH.DS) and its modification by chronic, intermittent WIN55,212-2 administration. Data shown represent the variable importance to the projection (VIP) as derived from partial least squares regression (PLSR) analysis with

the DSub as the “seed” brain region (dependent variable) and all other brain regions of interest (RoI) as the explanatory variables. Data were statistically analysed using Student’s t-test with Bonferroni post-hoc correction for multiple comparisons. Bold denote a significant functional connection to the seed region (95% confidence interval of the VIP statistic exceeds 0.8 threshold). \*denotes  $p<0.05$ , \*\*denotes  $p<0.01$  and \*\*\*denotes  $p<0.001$  significant difference from control animals. DH denotes dorsal hippocampus, VH denotes ventral hippocampus.

Median Raphé (MR)	0.67 ± 0.02		<b>1.42***</b> ± 0.08

Functional connectivity of the mediodorsal thalamic nucleus (MD) and its modification by chronic, intermittent WIN55,212-2 administration. Data shown represent the variable importance to the projection (VIP) as derived from partial least squares regression (PLSR) analysis with the MD as the “seed” brain region (dependent variable) and all other brain regions of interest (RoI) as the explanatory variables. Data were statistically analysed using

Student's t-test with Bonferroni post-hoc correction for multiple comparisons. Bold denote a significant functional connection to the seed region (95% confidence interval of the VIP statistic exceeds 0.8 threshold). \*denotes  $p<0.05$ , \*\*denotes  $p<0.01$  and \*\*\*denotes  $p<0.001$  significant difference from control animals. DH denotes dorsal hippocampus, VH denotes ventral hippocampus.

Table S6. Functional Connectivity of the Globus Pallidus

RoI	Control	WIN55,212-2 Treated
anterior Prelimbic Cortex (aPrL)	<b>1.10</b> ± 0.07	0.95 ± 0.06
Frontal Association Cortex (FRA)	0.71 ± 0.10	<b>1.07</b> ± 0.04
Dorsolateral Orbital Cortex (DLO)	0.72 ± 0.05	<b>1.34**</b> ± 0.09
Lateral Orbital Cortex (LO)	<b>1.01</b> ± 0.09	0.70 ± 0.04
Medial Orbital Cortex (MO)	0.55 ± 0.06	0.61 ± 0.06
medial Prelimbic Cortex (mPrL)	0.66 ± 0.05	<b>1.30***</b> ± 0.05
Infralimbic Cortex (IL)	0.63 ± 0.05	0.71 ± 0.07
Nucleus Accumbens Core (AcbC)	<b>0.90</b> ± 0.05	0.53* ± 0.05
Nucleus Accumbens Shell (AcbSh)	0.73 ± 0.05	0.61 ± 0.04
Dorsolateral Striatum (DLST)	<b>1.61</b> ± 0.02	0.52*** ± 0.03
Ventromedial Striatum (VMST)	<b>1.02</b> ± 0.08	0.57* ± 0.05
Medial Septum (MS)	<b>1.45</b> ± 0.04	0.67*** ± 0.03
Lateral Septum (LS)	0.80 ± 0.05	0.73 ± 0.05
Ventral Limb Diagonal Band Broca (VDB)	<b>1.66</b> ± 0.03	0.51*** ± 0.03
Horizontal Limb Diagonal Band of Broca (HDB)	<b>1.39</b> ± 0.05	0.52*** ± 0.10
Piriform Cortex (Piri)	<b>1.14</b> ± 0.08	0.68* ± 0.05
Insular Cortex (Ins)	0.54 ± 0.04	0.76 ± 0.10
Cingulate Cortex (Cg1)	0.59 ± 0.04	<b>1.26***</b> ± 0.04
Somatosensory Cortex (S1)	<b>1.49</b> ± 0.07	0.46*** ± 0.04
Anteroventral Nucleus (AV)	0.79 ± 0.06	<b>1.03</b> ± 0.08
Anteromedial Nucleus (AM)	<b>1.01</b> ± 0.06	<b>1.11</b> ± 0.09
anterior Reticular Thalamus (aRT)	0.64 ± 0.03	0.52 ± 0.13
Mediodorsal Nucleus (MD)	0.61 ± 0.04	<b>0.98*</b> ± 0.07
Ventrolateral Nucleus (VL)	<b>1.30</b> ± 0.03	<b>1.14</b> ± 0.06
Habenula (Hab)	<b>1.15</b> ± 0.03	0.93 ± 0.07
Ventromedial Nucleus (VM)	0.50 ± 0.05	<b>0.97</b> ± 0.11
Basolateral (BLA)	<b>1.08</b> ± 0.05	0.51*** ± 0.07
Central (CeA)	0.79 ± 0.08	0.38* ± 0.03
Medial (MeA)	<b>1.59</b> ± 0.04	<b>1.09***</b> ± 0.06
Retrosplenial Cortex (RSC)	0.38 ± 0.07	0.54 ± 0.09
Molecular Layer (DH.Mol)	<b>1.25</b> ± 0.05	0.62** ± 0.09
Cornu Ammonis 1 (DH.CA1)	<b>1.17</b> ± 0.05	<b>1.28</b> ± 0.04
Cornu Ammonis 2 (DH.CA2)	0.63 ± 0.09	<b>0.98</b> ± 0.07
Dentate Gyrus (DH.DG)	0.45 ± 0.10	<b>0.89</b> ± 0.06
Medial Geniculate (MG)	<b>1.04</b> ± 0.05	<b>0.97</b> ± 0.05
Molecular Layer (VH.Mol)	0.57 ± 0.04	0.76 ± 0.05
Dorsal Subiculum (VH.DS)	<b>1.23</b> ± 0.07	<b>2.07***</b> ± 0.03
Cornu Ammonis 1 (VH.CA1)	<b>0.90</b> ± 0.06	<b>0.99</b> ± 0.06
Cornu Ammonis 3 (VH.CA3)	<b>1.55</b> ± 0.10	0.79*** ± 0.03
Dentate Gyrus (VH.DG)	0.50 ± 0.05	<b>1.08*</b> ± 0.11
Substantia Nigra pars Reticulata (SNR)	0.50 ± 0.03	<b>0.88***</b> ± 0.03
Perirhinal Cortex (PRh)	0.45 ± 0.10	<b>1.12**</b> ± 0.05
