	** : * ** :: * .

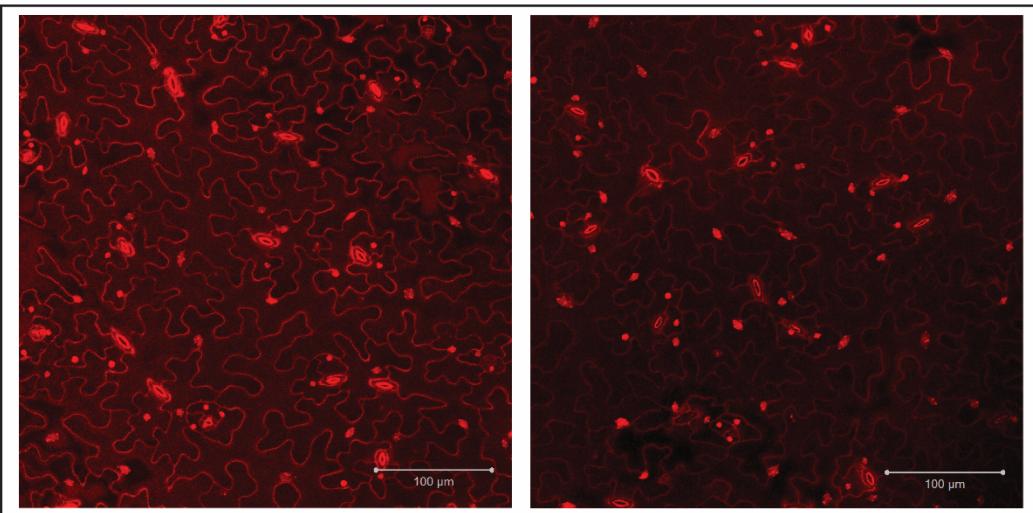

SUPPLEMENTARY FIGURE 1. Alignment of proposed LOX2 eIF4E binding motif. The proposed binding site in *A. thaliana* is highlighted in red. The motif shows poor conservation in LOX2 homologs of flowering plants.

A**B**

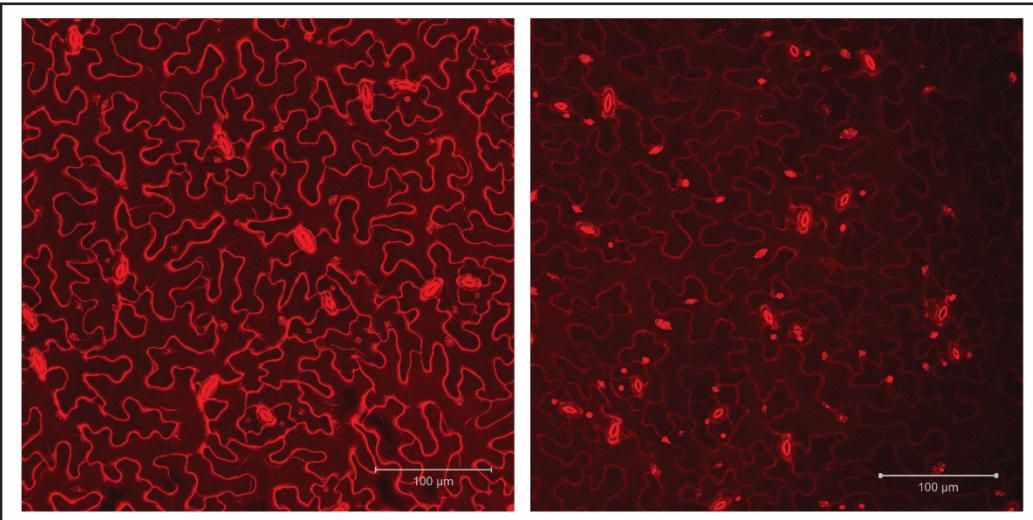

SUPPLEMENTARY FIGURE 2. The T-DNA line *eif4g*. (A) Location of the T-DNA insertion in the seventh exon of the *EIF4G* gene. (B) RT-PCR of *TUB2* and *EIF4G* in cDNA prepared from 7-day-old Col0 and *eif4g* seedlings indicates loss of full length *EIF4G* transcript.

SUPPLEMENTARY FIGURE 3. Root growth of *A. thaliana* mutant lines relative to Col0 on vertically grown MS media plates with 1% sucrose for 12 days. Asterisks mark statistically significant differences from wild-type (Student's t-test, p value < 0.05, n=24).
