

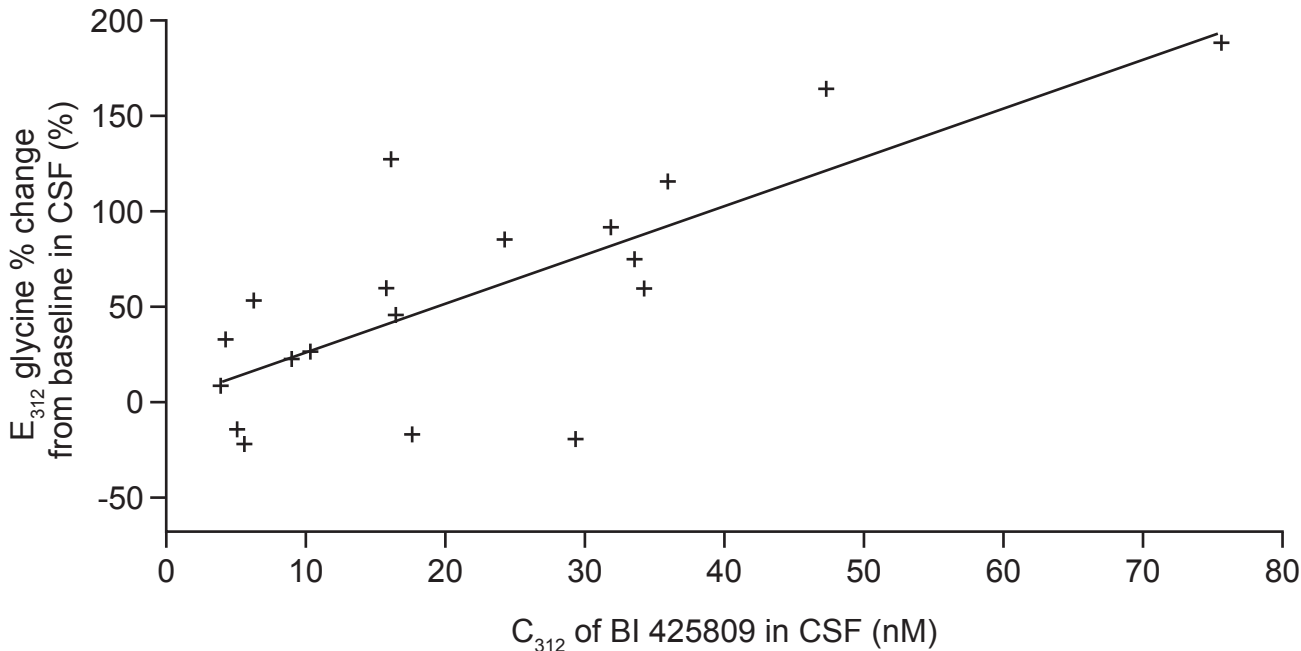

Figure S3. Percentage change from baseline in individual E₃₁₂ of glycine in CSF versus plasma at trough in steady state (C₃₁₂) of BI 425809 in CSF (all treatment groups pooled)

CSF, cerebrospinal fluid; C₃₁₂, concentration of BI 425809 in plasma and CSF at the time point 312 h; E₃₁₂, effect of glycine at the time point 312 hours before the last dose is given.
