3 **Figure S6.** Representative 3D reconstruction image of z-stacked confocal images of NRVMs  
4 grown on PCL/PDA nanofiber scaffold with a color depth.

**Figure S7.** Cytotoxicity tests for cardiomyocytes cultured on fiber MTFs. a) Comparison of lactate dehydrogenase (LDH) release of cardiomyocyte MTFs, pre- and post-exposure to TiO<sub>2</sub> at 10 and 100 µg/mL. b) Comparison of cell viability based on MTT assay for cardiomyocytes unexposed and exposed to 50 µg/mL Ag nanoparticles. Bars represent standard error,  $n=8$  per condition for LDH assay,  $n=16$  for MTT assay. For statistical comparison, \*\* $p<0.05$ .
